The Rheumatoid Fatigue

by NEWLIFEOUTLOOK TEAM

Rheumatoid Arthritis Fatigue Facts

With rheumatoid arthritis, you can still balance everything happening in your life and keeping up with it. You should get some extra help around the house, especially with anything that affects your joints, such as washing the dishes or the windows. You should also see what support your workplace can offer you. You might be able to work from home and telecommute to meetings or other events that you need to be a part of in order to keep up with how the business is progressing and actions that you need to take.

School work
Community activities
Sense of self
Your appetite
Measuring Fatigue
The Fatigue Severity Scale (FSS) is a self-reported questionnaire used to measure your fatigue. It consists of ...
NINE
Questions,
each rated on a scale of
1-7
To score the Fatigue Severity Scale either add all items together (this will range from 7-63) or find the mean by adding your items together and dividing by 9 (this will range from 1-9)
In either case, the higher the number you calculate is, the more fatigued you are.
Tips for
Reducing Fatigue
1
Quantity & Quality of Sleep
Have a regular bed time and wake up time
Use your bed just for sleeping
Do quiet activities if you're not sleepy
Room should be dark and quiet
2
Proper Nutrition
Get daily value of vitamin and minerals
Find out about proper nutrition at choosemyplate.gov
Contact your doctor or a nutritionist/dietitian so you can get the most out of what you eat
3
Regular Exercise
Choose an enjoyable exercise
Do what you can and then try doing a little bit more each day
Try tai chi and yoga to combine stretching, breathing, and calming exercises
4
Relaxation
Avoid stress or stressful situations
Do what you find relaxing: read a book, do yoga, sit outside, listen to music, etc.
5
Balance Work and Personal Life
Spend your time off work with family, friends, or doing preferred activities
Limit the amount of work you bring home with you
6
Avoid Drug Use
Avoid stimulants including: coffee, nicotine, methamphetamine, cocaine
Avoid sedatives
